

## Technical Datasheet

# Sirocco Welding Gas Pre Heater

CO2 gas pre heater with a working flow of up to 40 CFH without risk of freezing or noticeable changes in flow/ pressure.

Fits onto a CO2 cylinder and heats the CO2 gas prior to entering the regulator to prevent damage to the regulator in high flow applications.

- Body forged from class A brass bar ensures maximum strength, serviceability and safety.
- Housing is made of inflame retardant PC, ensuring insulation and flame retardance.
- Power monitor displays heating status.

|                    |                             |
|--------------------|-----------------------------|
| Power Rating       | 230V, 50/60HZ, 200W         |
| Voltage            | 110V, 240V                  |
| Gas                | CO2                         |
| Max Flow           | 3.2KG/h (28L/min) @ 200 Bar |
| Max Inlet Pressure | 230 Bar                     |
