

Protex Plus

Anti spatter surface protector

Protex Plus is an excellent spatter protection specifically designed to provide a safe welding environment. Comes in aerosol cans. Effortlessly sprays in an even coat on welding surface. Any spatter can be brushed or wiped away before painting. Emulsifiers in this product make it a clear choice for use with oil-based paint.

Use Protex Plus on all surfaces where spatter or slag dross from welding or cutting is objectionable.

- Easy to use aerosol spray
- Non-toxic
- Protects surfaces
- No chlorinated solvents
- Protects MIG torch nozzles and contact tips
- Compatible with painting
