sifWELD Evolution MTS400SYN

Approved

500 Amp Digital Multi-Process Inverter'

TSXE3D400MTS

Professional MIG welding system

for industry

The sifWELD MTS400SYN is a professional, microprocessor-controlled inverter welding package for MIG, MMA & Lift-TIG applications .

With 100% Duty Cycle at 400A and 60% at 500A this machine is the ideal work horse for high production manufacturing in air cooled or water cooled versions. Using the built in synergic facility the machine will automatically give the optimum welding parameters for the specific material, wire size and shielding gas.

Featuring IGBT technology and providing a lightweight, multi-process machine. A separate wire feed system with full feature control.

Main features

- 500A, Three phase MIG welding machine with separate wire feed unit
- Synergic or manual settings
- Very high duty cycle, 100% at 400A, 60% at 500A
- Perfect machine for high production environment.
- Supervisor lock out included
- Full digital control with large colour LCD Screen for showing and changing all welding parameters on both the power source and the WFU.
- 15Kg Reel or Bulk Drum
- Water cooled or air cooled ready to weld packages.
- 5M or 10M interconnect cable
- 25m interconnect cable for special applications
