

# Eco Tech

## Pre-weld anti spatter

Eco Tech is the value anti spatter spray that keeps the welding torch nozzle and tip clear and prevents spatter from sticking to the workpiece surface. It is an excellent choice where working temperatures are low.

- Working temperature of 100 °C
- Tested to weld up to 1 m (3 ft) with one time coating of nozzle & tip
- Less cleaning after weld. Swipe of brush over the surface removes spatter or just tapping
- Water based, non-flammable, nontoxic, silicone free, no fumes and safe for welders
- Composed of a special mixture with ingredients in water and a anti spatter base of 8.1%
